

BlueStack Micro user manual

Using the BlueStack Micro is quite simple. Let us start with a simple introduction of the hardware:

LED's in the bottom Orange square:

- 1: BlueTooth Status, normally blinking.
- 2: Bluetooth active in connection, Lit when connected via App.

Connector in the right Bottom RED Square:

This connects to the DVMEGA raspberry pi-radio (dvmega.auria.nl)

Micro-USB connector in the GREEN square:

This connects to either:

- 1: USB-port of a PC.
- 2: Powerbank with MicroUSB cable.
- 3: Power-adaptor with MicroUSB connector.

The Micro-USB is for power-purpose only!

Mounting the board (Single or dualband):

Please use a PCB-spacer to fasten the top and the bottom board together. Size of the spacer which is delivered by default with the DVMEGA is ok to use here.

The yellow wire on the picture above is not needed for using the BlueStack-Micro.
